WELCOME TO
THE TEAM

PERFECTION IN EVERY DETAIL

Not many family-owned companies can look back on a history of five generations. What our ancestors started in 1886 continues to evolve. Our passion for hunting and technical perfection is what creates and reinforces the bonds between the generations. It continues to this day.

TRAVEL THROUGH TIME

Founder Ludwig Krieghoff was already a pioneer in his time. His insight "You shoot with the barrel, you hit with the stock"® is firmly rooted in the traditional manufactory. It forms the basis for the patented Krieghoff custom stock method.

1916

Heinrich Krieghoff, Ludwig Krieghoff's son, founds the company "Heinrich Krieghoff", also in Suhl.

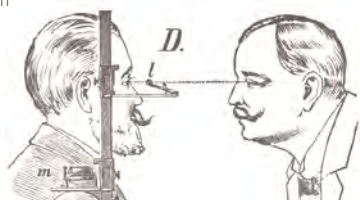

1905

Krieghoff's first adjustable insert barrel is patented.

1886

Ludwig Krieghoff, together with a partner, founds the "Sempert & Krieghoff" in Suhl, Thuringia.

1900

"You shoot with the barrels you hit with the stock"® this finding by Ludwig Krieghoff leads to the patented Krieghoff stock measurement principle.

1906

A pneumatic device to prevent "doubling" on drillings with a single trigger is presented.

"You shoot with the barrels you hit with the stock"®

1926–1930

The first over-and-under combination rifle/shotgun with manual cocking and de-cocking slide is presented. Krieghoff manufactures the world's first lugless shotgun.

1925

Krieghoff is the world's first manufacturer to introduce the lightweight Dural as a material in hunting weapon construction.

1919

The companies "Sempert & Krieghoff" and "Heinrich Krieghoff" are merged under Heinrich Krieghoff's direction.

1932

Krieghoff's semi-automatic rifle with gas-operated loading mechanism and block action debuts.

1956

Patent for a safety catch for breech action guns.

1960

The company moves into its present-day production site in Ulm's industrial area.

1966

Kenneth A. Jones (USA) becomes Trap World Champion with his Krieghoff K-32.

1957

Krieghoff presents its first competition shotgun: the K-32.

1967

Patent for free-floating barrels for combination guns.

THIS IS US: TRADITION AND INNOVATION

1970

Heinz-Ulrich Krieghoff takes over the management of the company.

1968

Patent for a single trigger for multi-barrel guns.

1976

Donald Haldeman (USA) wins gold in the Montreal Olympics.

1982

Patented Krieghoff scope mount.

1980

The K-80, successor of the K-32 is introduced. Dieter Krieghoff begins the marketing of Krieghoff shotguns in the USA after his studies.

1986

Founding of Krieghoff International Inc. in the USA by Dieter Krieghoff.

1993

The classic double rifle is presented at the IWA.

1992

The Krieghoff combi cocking device and the Universal Trigger System (UAS) are patent-registered.

1996

Adjustable muzzle with integrated wedge patented.

1995

The light and elegant Single Shot Rifle Krieghoff-Hubertus is being presented.

2000

With the K-20, the "little sister" of the K-80 is introduced.

2002

Optimized Krieghoff Optima Combi-Cocking Device receives utility patent.

2009

Phil Krieghoff is appointed Managing Director of H. Krieghoff GmbH.

2010

Krieghoff becomes official partner of the 50th ISSF World Championship and since then has had many successes in the Olympic disciplines.

2016

Contestants using Krieghoff guns win two Olympic medals.

2018

The women's edition of the K-20 is introduced at the SCI Convention in the United States, with the name "Victoria".

Heinrich Krieghoff presents the new K-32 in Triest.

Early key players: Hal du Pont, Nick Maynard, Viktor Brandl, H.-U. Krieghoff (l to r)

Don Haidemann wins Olympic gold in Montreal in 1976 with his K-32.

Left to right.: Jim Poindexter and Heinz-Ulrich Krieghoff in 1972 in the US.

Kay Ohye, legendary trap shooter and important source of inspiration for the enhancement of the K-80.

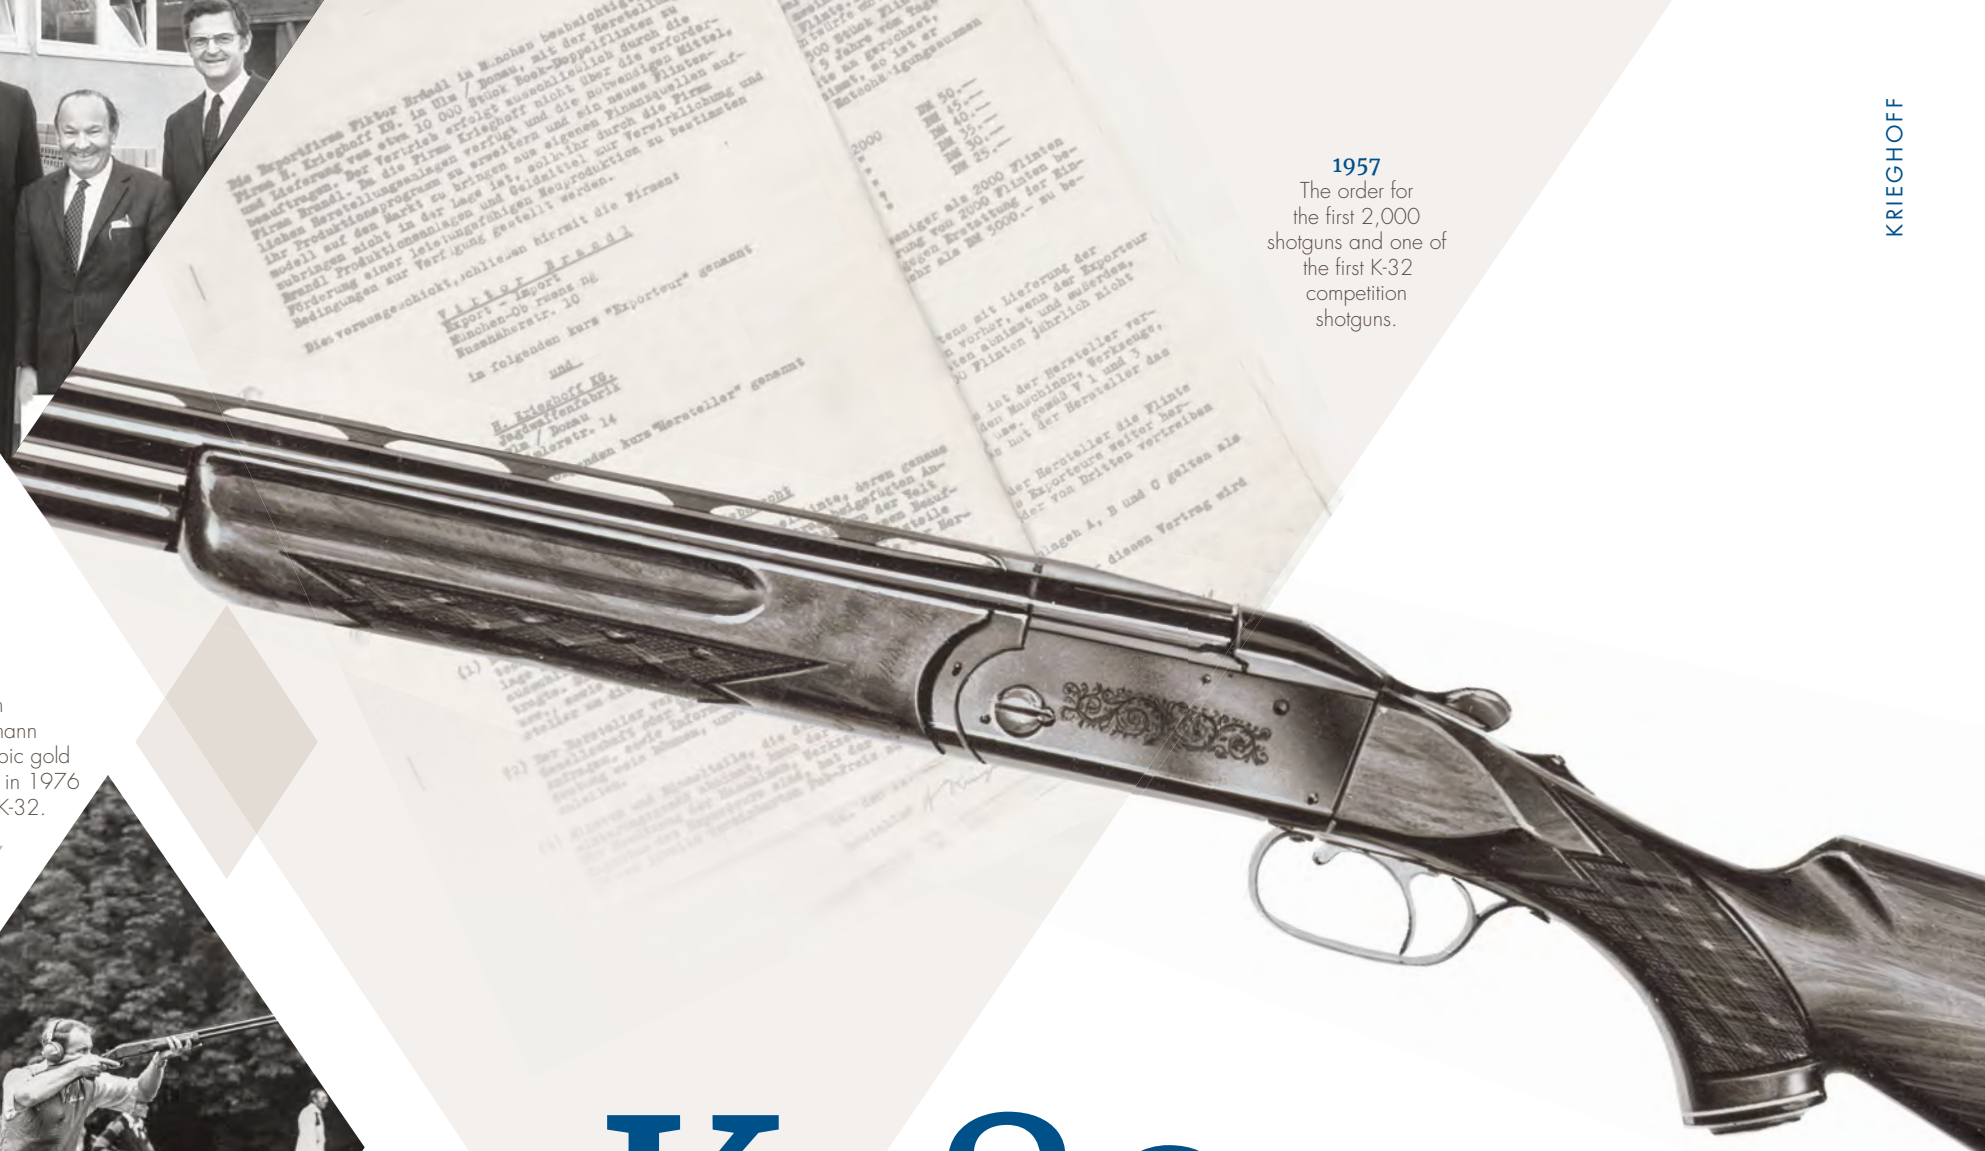

K-80

A SUCCESS STORY

◆◆ The K-80's legendary reputation is no coincidence. Krieghoff's very first shotgun, the K-32, helped build its foundation through our continuous design optimization over several decades. Remington developed the Model 32, a true competition shotgun, in the 1930s, but suspended manufacturing the complex firearm soon after its introduction. L.M. Donaldson, Trapshooting champion several times over, traveled to Germany bringing with him the idea of a perfect competition shotgun. In Krieghoff he found the gunsmith expertise he had sought for so long. The basic design of the Remington 32 was used as the starting point for the Ulm-based gunmakers' inaugural shotgun project. Inviting Krieghoff shooters to exchange their ideas and experience with the company further expanded after Dieter Krieghoff emigrated to North America in 1979 and later founded Krieghoff International, Inc. It was just such dialogue that led to the development of the K-80, an enhanced version of the K-32.

1957
The order for the first 2,000 shotguns and one of the first K-32 competition shotguns.

K-SYSTEM THE MODULAR SYSTEM

To this day, the concept of the Krieghoff competition shotguns is based on the optimal adaptation of the firearm to the individual requirements of the shooter and of the chosen discipline. The principle of interchangeability and modular systems make this possible.

ACTION

The K-80 breech has a reputation for being indestructible through proving time and time again that they easily fire over a million rounds outperforming competitive shotguns. Perfectly balanced with a far forward hinge, the breech plate lever is positioned for optimal ergonomics allowing an easy opening, yet ruggedly designed breech with a perfect weight and balance feel.

TRIGGER SYSTEM

The mechanical trigger of the K-80 is special: in the event of a misfire, the weapon still switches over and the 2nd shot can be fired safely.

STOCKS

K-80 Stocks, optimally designed from comb to pistol grip palm swell to suit each type of shooting sport, perfectly meet each shooter's individual needs. Adjustable comb stocks designed for an intuitive and consistent fit come standard on K-80 models. All stocks feature fine checkering, and are available in true right- and left-handed configuration. Custom stocks are an optional upgrade.

BARRELS

Barrels are offered in standard lengths: 28", 30", 32", and 34" (71 cm, 76 cm, 81 cm and 86 cm). The free-floating barrel design offers the ability to adjust the point of impact. The Parcours model with its light weight, hard-soldered barrel is the exception. All points of contact on the barrel set are hard-soldered to maximize durability and service life. The chambers are chromed to maximize their life. The long forcing cone reduces the recoil felt by the shooter. The inside profile of the barrel ensures an even pattern and maximizes the speed of the shot column. Most 12 gauge and 20 gauge configurations of the K-80 and K-20 lines are steel-shot proofed.

CHOKES

Conventional fixed chokes or screw-in titanium choke tubes are available for the K-80. Titanium chokes feature clearly marked constrictions on their knurled ends and can be replaced quickly. Nine constrictions, from Cylinder to Super Full, are available for all choke tube sets. Thin-walled screw-in chokes in either flush mount or extended styles are available options for the Parcours models.

HIGH~TECH MEETS

MANUFACTURING

Modern manufacturing technology does not always produce optimal results. At Krieghoff, we combine traditional hand craftsmanship and modern manufacturing technology.

More than half of all Krieghoff employees are hunters or sport shooters; so they know what really matters.

"Custom crafting and fitting by hand ensures a perfect point of impact."

More information on stocks can be found on page 91.

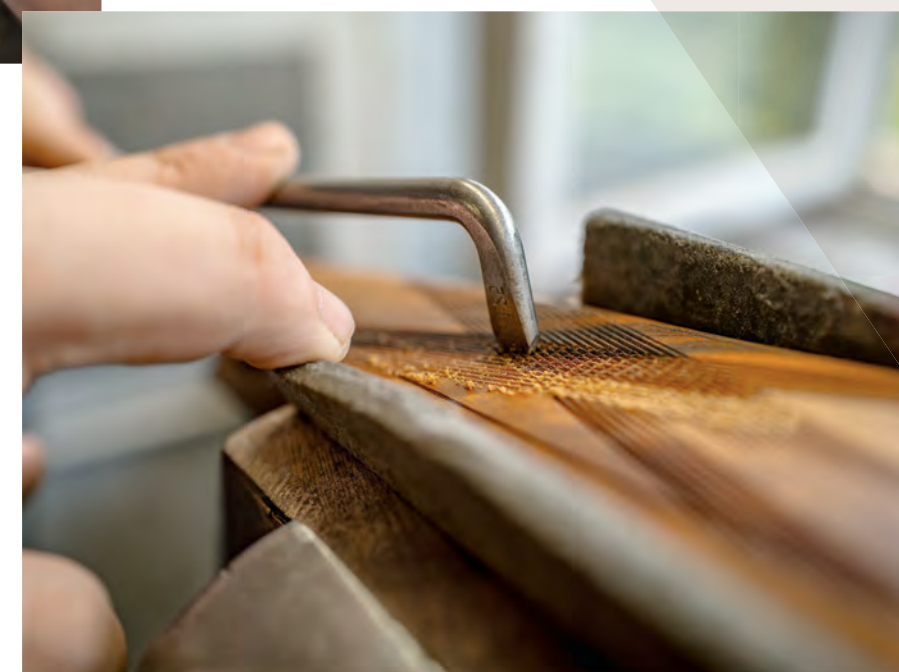

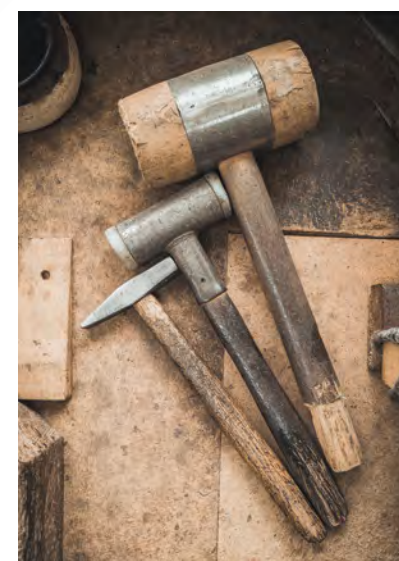

YOU SHOOT WITH THE BARREL – YOU HIT WITH THE STOCK®

The wisdom of Ludwig Krieghoff is just as sound today as it was a hundred years ago. Then as now, a plain piece of wood undergoes a 16-step process during its transformation into a flawless, custom-made stock.

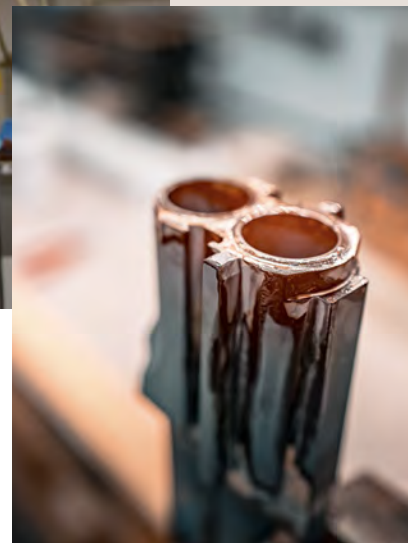

GUNSTOCK MAKER

◆◆ To visualize how best to design the stock from a blank in its raw form, how the composition and grain can be best utilized to maximize strength and beauty, is the essence of the boldness and flair of an experienced stock maker. Before shaping the stock, the wood category must be selected. It takes about eighty years of growth before a stock can be made from the wood of a walnut tree. During this time, nature creates an ever-unique and noble grain that speaks to the senses like almost no other material. Once the final shape has emerged from the chiseling and filing, and the stock has been seamlessly fitted to the receiver, finely carved checkering and surface finishing complete the work of art. Classic oiling or epoxying – both methods uniquely enhance the natural beauty of the wood. The end result is a stock that is a pleasure to hold and behold.

Only the
trained eye of
the barrel maker
ensures a
perfect result

BARREL MAKER

◆◆ Still, a Krieghoff's life does not begin until each of its parts has been assembled into a perfect whole by the hands of a knowledgeable gunsmith. Modern production technologies are indispensable in today's gun making, however, all crucial phases during the manufacturing of a gun are still done by the hands of an experienced gunsmith. Every craftsman completes his task with a passion for making every detail perfect. This is our commitment and goal to ensure the best quality possible.

More information on barrel options can be found on page 87.

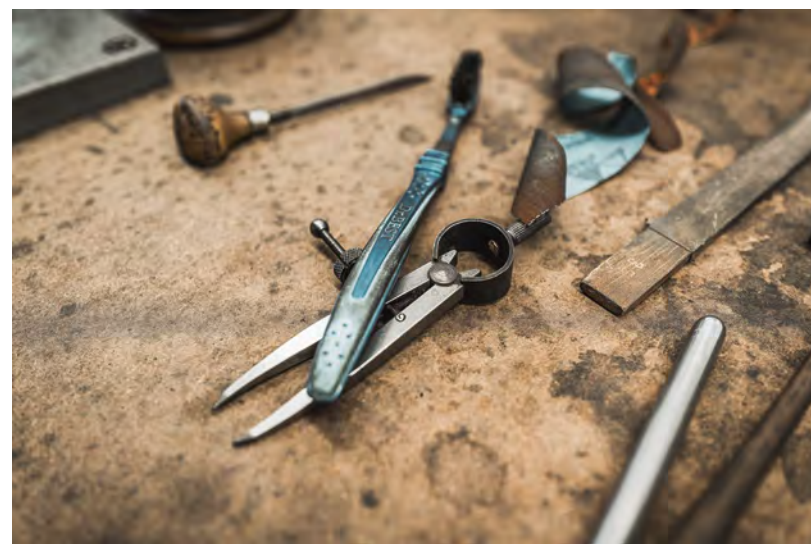

More information on engraving and finishing options can be found on page 90.

The engraving expresses the owner's personality and individuality

ENGRAVER

◆◆ For years, engravers have artfully applied the finishing touch to guns, lending them a unique character and an expression of their worth. A dialogue with the customer results in initial sketches, which are used to produce a harmonious design encompassing motif, style, and material. Krieghoff engravers have a comprehensive repertoire: from deep relief to the very finest Bulino style and from classic hunting scenes to the multifaceted ornamentations of various eras. From precious metal inlays to surface finishing – there are no limits to their creative imagination. Using their experience, finesse, and talent, our engravers create fine works of art that reflect both the passion and personality of the owner and the value and quality of an exquisite gun.

KRIEGHOFF GLOBAL A WINNING STREAK

On the winner's podium with Krieghoff: Around the globe, renowned target shooters and Olympic champions in target shooting including Corey Cogdell-Unrein (USA), Morgan Craft (USA) and Federico Gil (Argentina) put their trust in sporting shotguns made in Ulm. Our goal: to optimize your performance. Personal experience and the intensive collaboration with sporting shooters from all over the world are the drivers behind the dynamic ongoing development of this successful competition shotgun.

⌚ K-80

AREAS OF USE FOR THE K-80

SPORTING CLAYS
The modular design of the K-80 makes it the ideal competition shotgun. Thanks to a comprehensive range of optimally designed forearms and stocks, four standard barrel lengths, as well as fixed and adjustable ribs, the K-80 can be easily and optimally adapted to the requirements of every discipline.

HUNTING
The incredible performance of the K-80 is equivalent to a revolution that enhances success not only at the range but on every hunt as well. Its unique handling and balance make the K-80 a reliable and durable companion on your hunts.

K-80
Optimization for the respective discipline and perfect adaptation to individual requirements are part of the Krieghoff K-80 concept from the very beginning.

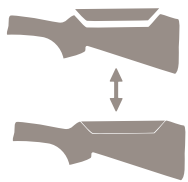

Figure:

category C1.

K-80 barrel sets are offered in standard lengths: 71 cm (28"), 76 cm (30"), 81 cm (32") and 86 cm (34"). Combined with a wide range of ribs, the K-80 becomes the perfect gun for every discipline.

Barrel set options can be found on page 87.

K-80
THE LEGEND

To achieve the perfect sight picture for every sporting discipline, Krieghoff offers a wide variety of barrel sets with perfectly matched ribs. Together with the appropriate stock design, the right version of K-80 is created for your discipline.

Standard grade fine walnut wood and six optional wood upgrades are offered.

Stocks designed for optimal performance in each type of sport are available for the K-80. The adjustable comb stock can be easily dialed in to suit individual requirements.

Custom stocks, available to order on all models, are made in house.

K-80 barrel sets are available in gauges 12, 20, 28 and .410.

K-80 Trap Special

K-80 Trap

K-80 ProTrap

K-80 TRAP

Trap is one of the oldest shooting disciplines and is internationally popular among competitive shooters. Trapshooting has been an Olympic discipline since 1900. Due to its features and adaptability, the K-80 is virtually predestined for these types of sports.

K-80 TRAP

Barrel length: 76 cm or 81 cm (30" or 32"); 12 mm tapered step rib, soldered; Right-handed Trap Monte Carlo stock; Trap forearm with slanted end. Optional 86 cm Unsingle barrel. Weight: approx. 9 lb, ca. 4.120 g

*shown with upgraded wood

K-80 PROTRAP

Barrel length: 76 cm or 81 cm (30" or 32"); Optional 86 cm (34") Unsingle barrel; Rib: 10 mm tapered (12 mm with bevel), adjustable, highest selectable shot pattern: 70/30%; Right-handed "ProTrap" stock; "Trap" forearm with slanted end. Weight: approx. 9 lb, ca. 4.070 g

*shown with upgraded wood

K-80 TRAP SPECIAL

Barrel length: 76 cm or 81 cm (30" or 32"); Optional 86 cm (34") Single Barrel; Rib: "Trap Special" 10 mm tapered (12 mm with bevel), adjustable, highest selectable shot pattern: 100% (optional "Pro" rib with 120% high pattern; Right-handed "Trap Special Rollover" stock; Trap forearm with slanted end. Weight: approx. 9 lb and 8 oz, ca. 4.310 g

*shown with upgraded wood

K-80 SPORTING

Ambitious, demanding sport shooters know why they value the Krieghoff K-80. From muzzle to pad, this sporting shotgun is designed to compete: absolutely uncompromising in reliability, durability and flexibility.

K-80 ProSporter

OUR PROMISE A PASSION FOR QUALITY

The right shotgun for every situation: Krieghoff is not merely a manufacturer of hunting firearms and competition shotguns, but a mindset and a lifestyle. Since 1886, Krieghoff has been synonymous with tremendous innovative drive paired with the expertise and reliability of a company rich in tradition and history.

⦿ K-20

K-20 STANDARD EQUIPMENT

- Five choke tubes with knurled ends and choke wrench are included with K-20 Choke tube models
- Hinge screw, top latch, screws and pins are blued
- Steel receiver with nickel finish
- Mechanical single trigger, adjustable-length trigger blade
- Standard engraving: "Tasteful arabesques"
- Standard grade wood
- Delivered in a Premium Gun Case
- K-20 is available in the gauges 20, 28, .410

K-20

THE ELEGANT ALLROUNDER

The K-20 is a true Krieghoff in every respect. All features of the legendary K-80 action have been incorporated in the K-20 and adapted for its smaller gauge frame. The outside dimensions of the receiver have been scaled accordingly, resulting in a fascinatingly lean shape and the excellent balance of the shotgun. Whether it be for sporting clays, skeet or in field, the K-20 shines.

AREAS OF USE FOR THE K-20

HUNTING

The K-20 offers the same superior performance as its big sister, incorporating all of the technical highlights in a slimmer, lighter form, with excellent balance and handling.

SPORTING CLAYS

Powerful and durable. Not only the resilient receiver with its exceptional trigger, but the versatility in configuring the gun to your personal preferences make the K-20 the ideal competition shotgun.

Standard grade fine walnut wood and six optional wood upgrades available

Naturally, custom stock fitting is always available.

The streamlined little sister of the K-80: Its receiver includes all of the features of its iconic model

K-20 GRACEFUL YET STRONG

The "twenty" is considered by many to be uniquely fascinating in its own right. Lean and light, it does not take a back seat in performance to any of the typical 12-gauge shotguns. In the "Sporting" version, the K-20 shotgun with its free-floating barrels is optimized for skeet and hunting.

K-20 SPORTING

Rib: 10 mm tapered flat, non-adjustable; free-floating barrel set; straight "Sporting" stock, non-adjustable, stock finish: epoxy; "Sporting" forearm with straight end. Weight: approx. 8 lb, ca. 3.500 g

K-20 BY TRADITION ONE OF THE BEST

Whether lightning-fast grouse in England, doves in Argentina, majestic pheasants in South Dakota or red-legged partridges in Spain, a reliable shotgun is a must for exclusive upland bird hunting of this kind. The perfect choice: the new K-20 Parcours. The key to success is first and foremost the intuitive mount. Everything else follows naturally. Your instinct aims – the K-20 Parcours hits. Hunting is a fast sport that happens on the move, thus balance, liveliness, and a light weight are essential in a shotgun. The Parcours soldered barrel set and streamlined form offer outstanding balance essentially allowing the shooter and the gun to become one.

NO COMPROMISES

The K-20 is a true paragon of elegance and longevity. Its technical features hold their own against the 12-Gauge K-80. Light and lean with beautiful handling, it is the ideal companion for every hunter and sport shooter.

K-20 PARCOURS WITH FIXED CHOKES

Barrel Length: 30" or 32"
(76 cm or 81 cm);

VICTORIA

Krieghoff Victoria Case specially designed for the Victoria. The tan leather and cream colored case accents as well as protects the beauty of the Victoria.

“THE VICTORIA IS A TESTAMENT TO MY PASSION”

I am enamored with the K-20 Victoria shotgun not just for its exceptional craftsmanship and advanced engineering, but for the way it encapsulates a harmonious blend of timeless design and cutting-edge performance. The shotgun's handcrafted aesthetics and meticulous attention to detail speak to my appreciation for the blend of elegance and performance. Beyond its stunning appearance, the K-20 Victoria's functionality and precision elevate my confidence as a shooter and hunter as I know I am handling the best in the world. Each time I use it, I'm reminded of the dedication that went into creating a masterpiece. The Victoria isn't just a shotgun; it's a testament to my passion for the perfect blend of beauty and power.

K-80/S, K-20/S A TIMELESS CLASSIC

Krieghoff, is excited to launch the new K-80/S. A timeless classic, the K-80 has a proven design requiring few technical modifications in its four decade history stemming from the original K-32. Recently designers envisioned the idea of adding sideplates to provide a "new" classic look of the sideplate and sidelock guns of the past with graceful lines and identical in all other aspects. The very limited edition gives room for elaborate works of art providing engravers an expanded canvas to the K-80 receiver. The sideplate version is now also available for the K-20.

Custom engraving:
This outstanding K-20/S features a fine relief engraved upland and waterfowl birds with reverse gold as background.

Custom engraving:
"Summer's End" on a limited edition new K-80/S takes us to summer's end with wild flowers and wheat in their full enameled and gold beauty. A wingshooter's dream of pheasants, quail and woodcock adorn the receiver, top latch and trigger guard. Reverse gold gives the golden feeling of summer's last days and the anticipation of the upcoming hunting season.

CUSTOM ENGRAVINGS

Custom engravings are the result of sophisticated craftsmanship and expertise, individually designed in accordance with your wishes. Krieghoff offers a wide range of ornate, extremely detailed and beautifully executed motifs that leave nothing to be desired. Each engraving is unique.

Custom engraving:

The Gun of the Year 2017 "Buffalo Bill" illustrates the fine art of engraving. The individual objects are portrayed with great detail and delicacy. The receiver's right side shows how Cody earned his famous moniker. The receiver's left side shows Buffalo Bill riding into the middle of his Wild West Show proudly bearing the American flag, symbolizing his deep patriotism. The Buffalo nickel is engraved on the hinge pins, showing a Native American on one side and a buffalo on the other. The bottom of the receiver shows the classic showman pose Buffalo Bill was famous for. Engraved on the top latch is the Medal of Honor awarded to Buffalo Bill for his work as a civilian scout during the Civil War. The dates of his birth and death adorn the trigger guard.

Custom engraving:
"Elements of Time"
The "Elements of Time" is a one-of-a-kind featuring exquisite detail accompanied by brilliant enamel and inlaid precious gems, making this work of art "timeless". Creative Art is known for their extensive artistic and compositional talents.

2010
GUN OF
THE YEAR

Custom engraving:
"Arabic Ornament"
Inspired by Arab architecture, this unique engraving was designed with fine, inlaid gold lines and whimsical symmetry.

2016
GUN OF
THE YEAR

Custom engraving:
This 2010 Gun of the year, "Horses" features bright inlaid enamel and captures the beauty and mystery of these majestic creatures.

Custom engraving:
"Custom Waterfowl"
with gold inlays, very detailed scenes with waterfowl integrated in a floral ornament with English arabesques.

Custom engraving:
The Gun of the Year 2016 was dedicated to the mysterious continent of Australia: "Terra Australis".

Custom engraving:
"On the Hunt"
captures the spirit of the American waterfowl hunt featuring inlaid gold and delicate detail to the outdoor experience.

Custom engraving:
"Winter"
Portraying the winter
season was a huge
challenge for our
engravers.
The snowy and icy
surfaces were created
with white gold.
The flying ducks were
done in red and
green gold.

Custom engraving:
The Gun of the Year 2018
"Leonardo da Vinci"
The brilliant mind of Leonardo da Vinci
produced legendary artwork captured
here on the K-80. Fine Bulino
engraving captures the detail of
da Vinci's work while the deeper
Renaissance scroll
provides the
perfect frame.

"You can place
absolute trust
in the reliability and
perfection
of a Krieghoff in
every situation."

K-80

YOU SHOOT WITH THE BARREL YOU HIT WITH THE STOCK®

When it comes to ergonomics, a shotgun's stock is a key component. Every K-80 is equipped with a stock optimized for the relevant discipline, enabling flawless adaptation to the individual requirements of each shooter.

Shown above:
The adjustable comb can be moved 5/8" (15 mm) upwards and shifted by 3/16" (5 mm) to the left or right as required by the shooter.

The adjustable butt plate enables you to simultaneously adjust the pitch, drop, toe/heel and cast.

Right and left handed stocks
of the K-80 ProSporter

THE KRIEGHOFF BALANCE SYSTEM

The perfect balance of the Krieghoff competition shotguns can be individually adapted to the shooter, thanks to the "Krieghoff Balance System". With the sophisticated system of barrel and stock weights, the K-80 and the K-20 can be optimally balanced. The barrel is thereby equipped with up to three additional weights of 1.4 oz (40 g) each underneath the forearm.

Shown above:
The butt stock can be equipped with a special stock bolt, which is 1.4 oz (40 g) heavier than a standard stock bolt, and can accept up to five additional 1 oz (30 g) weights. So, the weight of the stock can be increased up to 6.7 oz (190 g).

K-80 PERFORMANCE AND FLEXIBILITY

The barrel set options for the K-80 make it possible to optimize the configuration for a wide variety of disciplines and to adapt the gun to suit individual preferences.

The choke system for the K-80: blued "Steel Chokes", titanium chokes: titanium colored, gold plated and black coated. For Parcous versions: Krieghoff KTW FlushFit Chokes or Krieghoff KTW Pro Chokes. The matching Krieghoff speed choke keys are also available.

Sporting barrel set / 12, 20, 28 and .410 gauge / Barrel lengths: 28", 30", 32" (71, 76, 81 cm) / Rib: 10-6 mm tapered flat, soldered

ProSporter / 12, 20, 28, and .410 gauge / Barrel lengths: 30", 32" (76, 81 cm) / Rib: 10-6 mm tapered (12-8 mm with bevel), adjustable, highest selectable shot pattern 70 / 30 %

Trap barrel set / 12 gauge / Barrel lengths: 30", 32" (76, 81 cm) / Rib: 10-6 mm tapered step, soldered

Trap Special barrel set / 12 gauge / Barrel lengths: 30", 32" (76, 81 cm) / Rib: Trap Special 10-6 mm tapered (12 mm with bevel), adjustable, highest selectable shot pattern 100% (alternative: Pro rib with 120% high pattern)

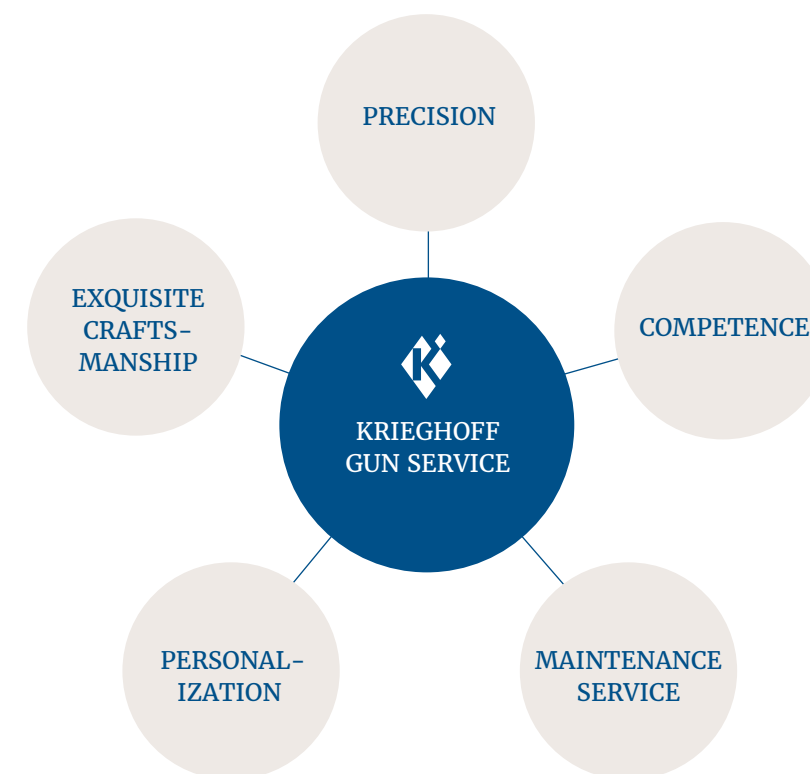

Trap Special Unsingle / 12 gauge / Barrel length: 34" (86 cm) / Rib: Trap Special 10-6 mm tapered

Parcours barrel set / 12, 20, 28 gauge / Barrel lengths: 28", 30", 32", 34" (71, 76, 81, 86 cm) / Rib: 8-6 mm tapered flat, soldered
Parcous-X barrel set / 12 gauge / Barrel length: 32" (81 cm) / Rib 10 mm tapered, soldered

SERVICE RELIABLE AT YOUR SIDE

◆◆ Regular maintenance of your quality products from Krieghoff ensures that you can rely 100% on the reliability and safety of your gun even after many years of use. You will find detailed information on our website at: www.krieghoff.de/en/service/gun-service/

Once a Krieghoff, always a Krieghoff. Even after decades we are still with you all the way. We can even service, repair and preserve models we no longer make. The purchase of a Krieghoff offers continuity, reliability and durability.

SHOTGUNS AS HEIRLOOMS

With the utmost care and flawless craftsmanship, Krieghoff produces shotguns to be passed down through generations – masterpieces that always retain their monumental value. As an integral part of our work, collaboration in a spirit of partnership is extremely important to us – and as with shooting, we are focused on a clear goal: optimally meeting the needs of our customers.

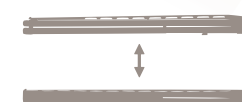

ENGRAVING AND FINISHING

◆◆ Transform your shotgun into an individual work of art. The clean surfaces and contours of the K-80 and K-20 offer a generously dimensioned design field for engravings of every style and manner of execution. The repertoire of catalog engravings shows the diversity of artistic options for enhancing the Krieghoff competition shotguns. Based on your design and ideas, our engravers can design and produce exclusive, one-of-a-kind pieces that will bring you timeless pleasure forever.

HANDCRAFTED AND CUSTOMIZED STOCKS

◆◆ A handcrafted stock is defined as a stock that has been manually produced to the largest extent (with only partial mechanical preprocessing), including the comb and/or forearm, from the original blank. Special wishes concerning the stock design (special stock shape, deviations from the standard length, etc.) generally require manual processing of the standard stock shape or a customized stock. In such cases, a personal fitting is essential. Our experienced stock makers ensure that your stock fits you perfectly, enabling you to confirm the truth in Ludwig Krieghoff's old saying: "You shoot with the barrel, you hit with the stock"®.

INTERCHANGEABLE BARRELS

◆◆ Our Factory Technicians are experts in precise barrel fits. Each new barrel can be fitted to your receiver providing optimal performance in multiple gauges.

K-80 AND K-20 MAINTENANCE SERVICE

◆◆ Your wish is our command. In addition to first-class shotguns, we'd also like to offer you first-class service. This goes for the construction of your Krieghoff according to your own specifications, as well as for repairs, stock modifications, retrofitting your K-80 or K-20 with a component from our extensive product range, and much more.

The catalog is available from your specialist dealer or can be downloaded from the company's website at: www.krieghoff.de
